

## Industrial Electrician

GerdaU is the fourth largest overall steel company and the second largest minimill steel producer in North America. The company has the capacity to manufacture over 12 million tons of mill finished steel products annually. Through an integrated network of minimills, steel scrap recycling facilities, and downstream operations, the company serves customers throughout North America.

We believe our employees are the best in the business. We have high standards and our employees constantly strive to reach even higher levels of success. GerdaU growth is based on our values and on a vision focused on excellence. We see customer satisfaction, the personal and professional growth of each employee, total safety in the workplace, a commitment to our stakeholders, employees, and communities, and profit as a measure of performance.

***GerdaU is currently seeking Industrial Electrician sfor its Selkirk Manitoba mill.***

Reporting to the Maintenance Supervisor, your main focus will be to test, repair, adjust and service all types of electronic and electrical equipment in the shop or field. This position works in the close proximity to line high voltage equipment.

### Position Responsibilities:

- Inspect and test equipment to determine extent of damage and nature of repairs required.
- Analyze all types of drawings and wiring diagrams to determine material or replacement needs, assembly specifications, and methods.
- Plan details of working procedures, determine tools and material requirements, and implement plan.
- Locate source of trouble in electrical equipment or apparatus by tracing and testing circuits and inspecting for operating failure.
- Dismantle, inspect, repair, replace or adjust faulty parts and wiring on electrical equipment such as motors, generators, air compressors, relay and control equipment, panel boards, switches, circuit breakers, transformers, resistance banks and electric trucks.

### Minimum Requirements:

- You must hold an Industrial Electrician Trade Certificate for Manitoba.
- Previous experience with troubleshooting skills combined with experience in preventative maintenance, cranes and PLCs is a plus.
- The ability to work a rotating 12 hour shift schedule.
- Experience using the following tools/equipment: wiring diagrams, drawings, calibrating and testing equipment, gauges, electrical and electronic tools, hand tools, pipe threading machine, drafting equipment, soldering iron, various types of wire, bolts, taps, wrenches, pillars, etc.

- Experience working with the following: AC and DC motors and generators, transformers, rectifiers, electronic controls and regulators, control systems and circuits, control panels, electronic gauges and detectors, circuit breakers, transistors, various mill and production equipment, conduit and fittings, wire and cable, solder, etc.
- The ability to work independently, and as part of a team.
- The ability to follow all safety guidelines.
