

Located in Winnipeg, Manitoba, Imperial Seed is primarily focused on seed multiplication of forage and turf species. We operate an accredited seed processing facility and work with Western Canadian farmers to ensure quality seed for domestic and international markets.

We are currently looking for a summer student to provide customer support to our valued forage and turf seed producers. This position will provide an excellent learning opportunity for a summer student willing to have a hands-on experience in agronomic support and customer service related to seed multiplication.

**Goals:**

- To work closely with the VP – Production and Agronomy to provide customer support to seed producers.
- You will have opportunities to assess field conditions, recognize issues that relate to successful seed production, make agronomic decisions and communicate with customers.

**Location:**

- The position is based in Winnipeg, MB.

**Requirements:**

- Agronomic knowledge, crop scouting and decision making skills.
- Willingness to travel during the work week is required for this position.
- Excellent communication, interpersonal and listening skills.
- Ability to work independently and demonstrate initiative.
- Knowledge of forage seed production is an asset but not required.
- Enrollment in an agriculture related program.
- Successful applicant will be asked to provide a driver's abstract demonstrating a safe driving record.

Closing Date: February 24, 2012
