

MONSANTO

Twenty years from now, the earth's population will need 55% more food than it can produce now. At Monsanto, we are working with farmers around the world to do something about it. In over 60 countries, we have established industry-leading products because we give people like you the freedom to make real decisions. We also have professional development programs and a history of building careers. After all, you'll solve what could be mankind's greatest challenge. Are you ready to start dreaming bigger?

From your first day, you'll be a contributing member of the team with meaningful responsibilities, which allows you to have a realistic look at a career with Monsanto. The program helps us assess your career potential as the majority of our 'new graduate' hiring comes from our past summer students. It's a great way to get the inside track on how an industry leader like Monsanto works.
