ASSINIBOINE COMMUNITY COLLEGE

Paper Doll

PROJECT

Welcome

Assiniboine Community College's paper doll project is a fun and creative activity for all ages, especially for our future students ages five to eight.

Feel free to print out this entire package or print out the pages your students prefer. Both full colour and black and white options are included so kids can choose the level of craftiness and creativity they want.

All pages can be printed on regular printer paper. However, for extra play-ability and the "traditional paper doll" look and feel, it's best if the page with the doll is printed on cardstock and the outfit pages are printed on regular copy paper.

If you ever wish to connect with Assiniboine about this project or our other activities designed for groups of all ages, please contact us at:

Instructions

- First page (with doll itself) should be printed on cardstock and all other pages should be printed on regular paper for best results.
- Print either the full-colour sheets of outfits, or for additional creativity, print out the black and white sheets of outfits and colour your own!
- Use scissors to cut along the dashed line around the doll and each piece of an outfit, including the extended tabs.
- Cut out the base piece and insert it in the shape of an "x" in the main doll's base.
- Use tabs to hold clothing in place on the doll.

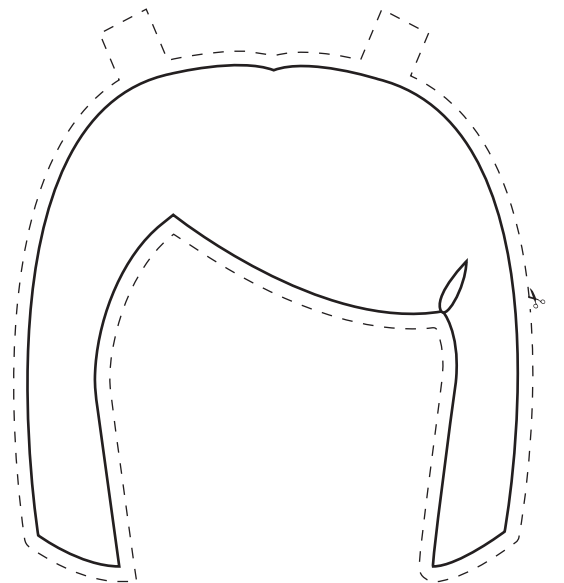

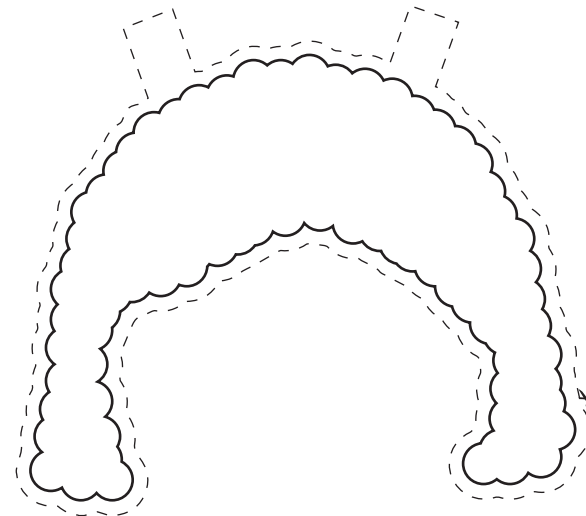

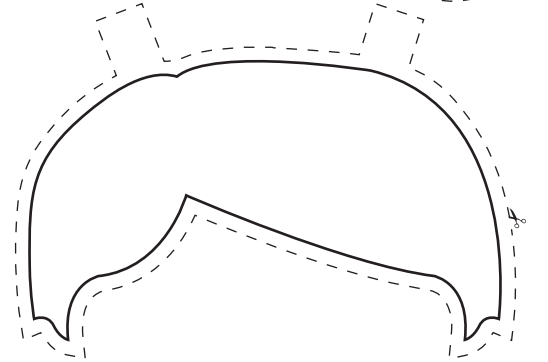

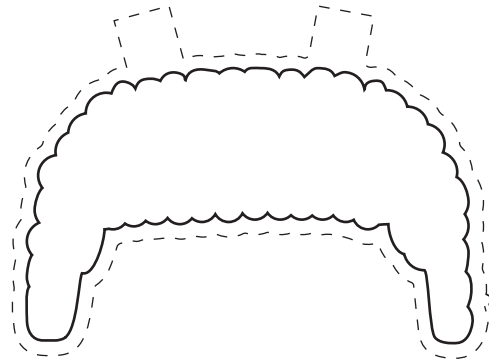

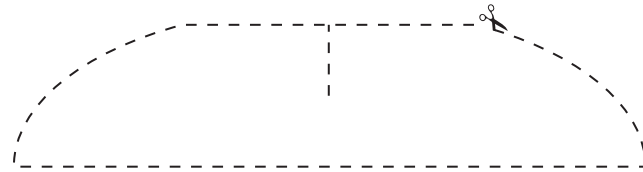

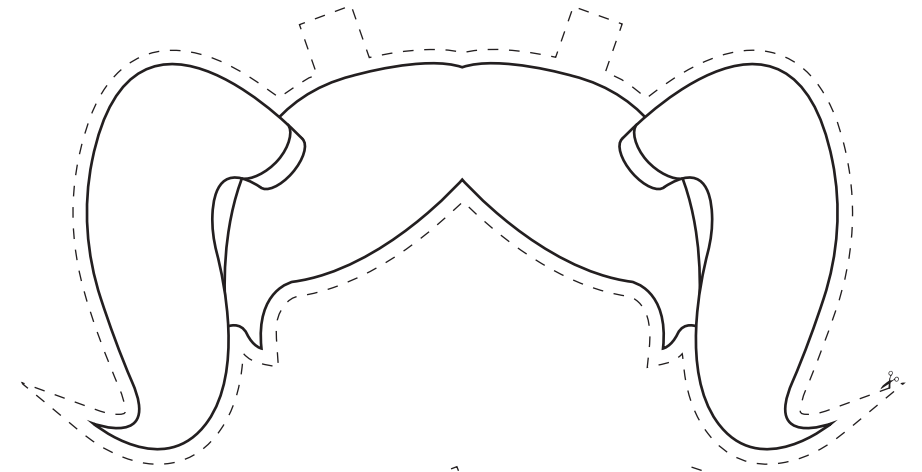

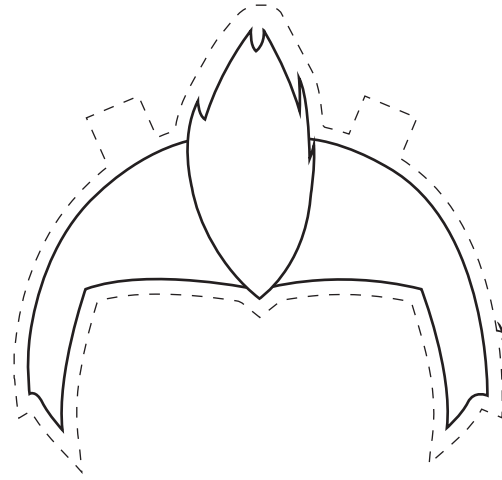

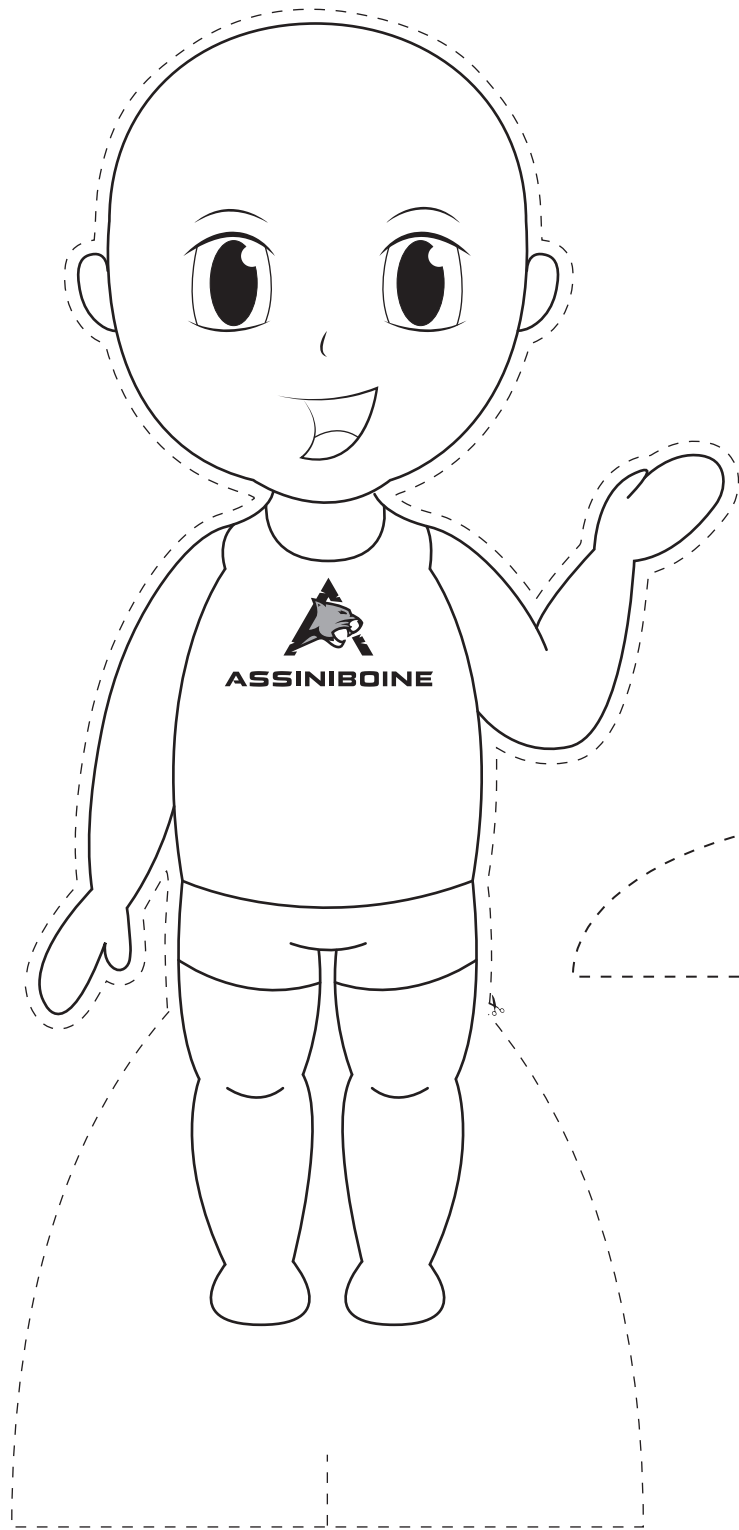

Grad Alert!

My name is Jess Paterson, and I am the illustrator who designed Assiniboine's paper doll project! A writer and graphic artist/designer, I am a graduate of the Interactive Media Arts program at Assiniboine Community College.

I love to draw, and some of my favourite things to draw are my very own characters that I create and write about. I'm originally from Saskatchewan, but have lived in Manitoba since 2004. I love to play rugby and go running.

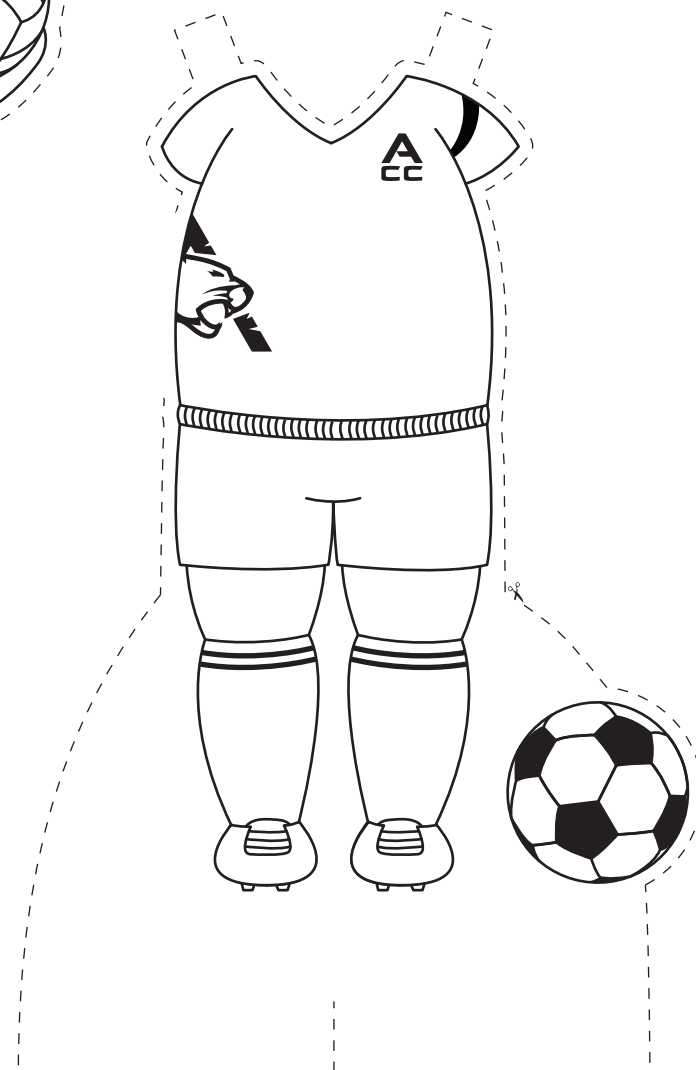

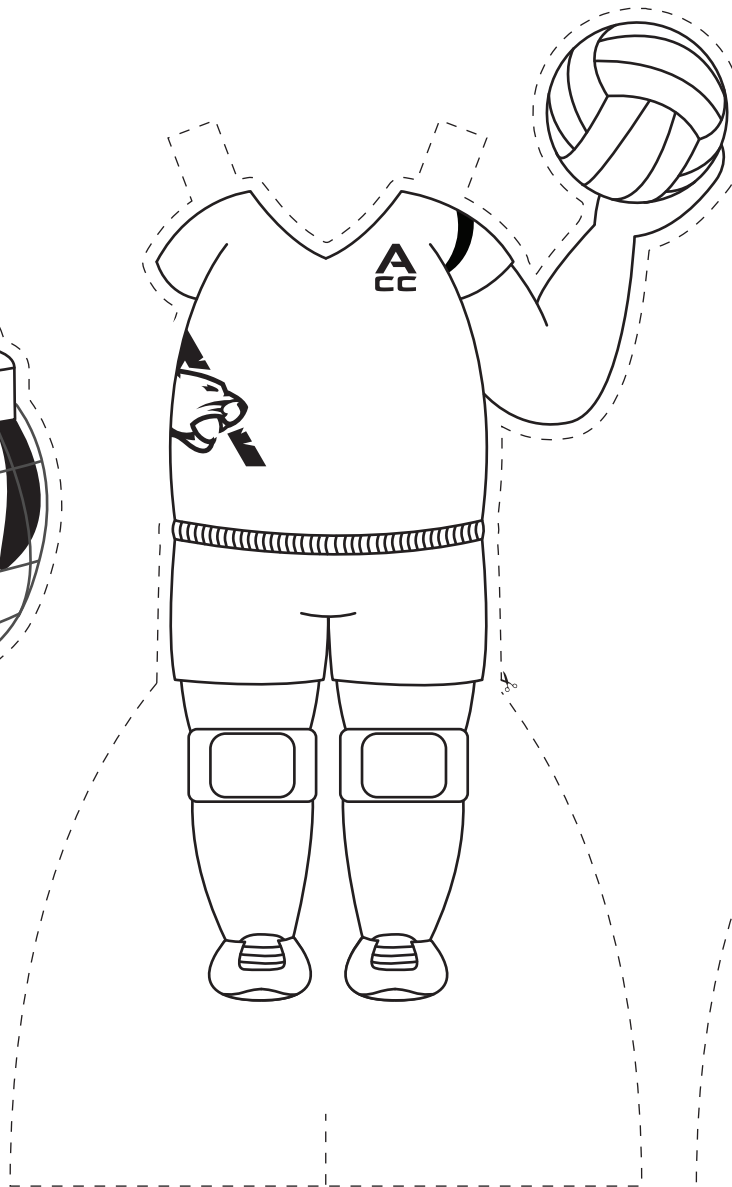

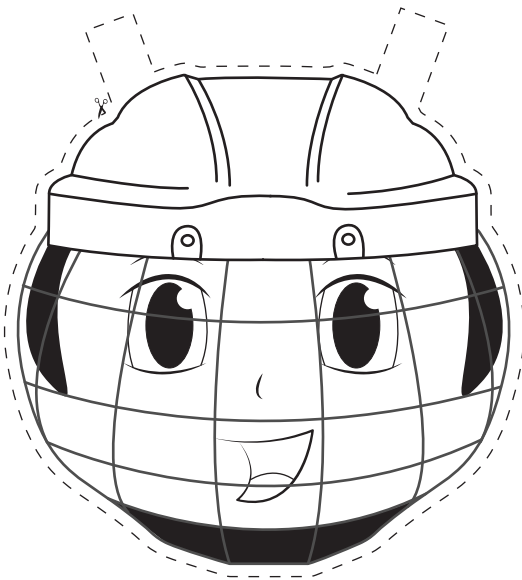

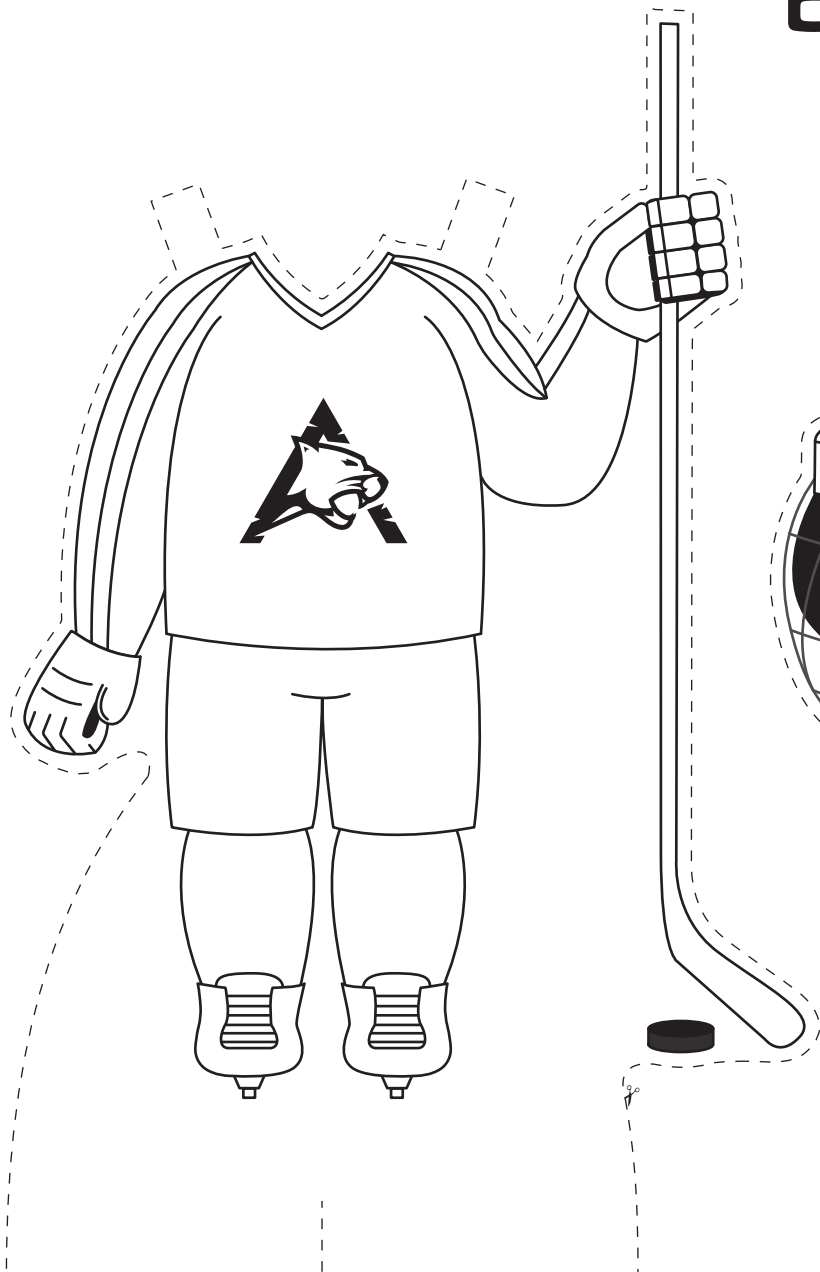

Thanks for playing with my creation; I hope you have lots of fun designing and colouring your own doll and outfits!
